

EP0999088

Publication Title:

Display device for motor vehicle

Abstract:

Abstract of EP0999088

The display unit has a display (2) whereby images presented on the display can only be viewed within a viewing angle range. Two mutually independent images (3,4) can be displayed, whereby an optical element (6) enables one image to be viewed only in a first range (alpha) of viewing angles and the second image (4) only from a second range (beta) of viewing angles.
